Introduction.

This Pollution Incident Response Management Plan (PIRMP) has been developed to conform to requirements as outlined in the Protection of the Environment Operations Act (POEO Act) 1997 and subordinate legislation. This document covers AKD Softwoods NSW operations. The plan applies to emergency services, all employees, visitors, contractors and also potentially impacted off site receptors in the event of a pollution incident.

The purpose of this plan is to;

- Detail how the business will assess and respond to a pollution incident to minimize the potential harm to human health and the environment.
- Detail the process to ensure timely reporting of incidents, and
- Detail how the business will notify those within the vicinity of the operations of potential impacts should a pollution incident occur.

AKD NSW Operations.

This plan is applicable to the following AKD Softwoods premises.

| Site | Location | Environmental protection licence | Link |
|-----------------------------------|---|-------------------------------------|--|
| Gilmore Timber Treatment Plant | Snowy Mountains Highway Gilmore NSW | EPL 1459 | https://apps.epa.nsw.gov.au/prpoeoapp/ |
| Tumut Sawmill | Adelong Rd Tumut NSW | EPL 63 | |

Table 1: AKD Operations in NSW

Legal Requirements.

Under the Protection of the Environment (General) Amendment (Pollution Incident Response Management Plans) Regulation 2012, **key parts of the overall plan must be made available** and easily accessible to the general public via the business website.

This PIRMP must be tested/reviewed within 1 month of a pollution incident and at least once annually. The Act imposes significant penalties for not preparing, keeping on site, maintaining, testing and implementing a PIRMP.

| Purpose | To provide the public with detail on how AKD will respond to a pollution incident. | | | | |

This plan is available electronically and can be accessed via the AKD Softwoods website (http://www.akd.com.au), from the administration building at respective sites, at the AKD Softwoods head office (9-15 Forest st Colac, Vic 3250) or by email request to info@akd.com.au.

Activation of this Plan.

All pollution incidents will be measured against this plan which will be activated when a pollution incident has the potential to cause material harm.

An incident is considered material under s.147 of the POEO Act if;

- it involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or (ii) it results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000 (or such other amount as is prescribed by the regulations), and
 - the loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.
- It does not matter that harm to the environment is caused only in the premises where the pollution incident occurs.

The incumbent in the following roles are authorised to activate the PIRMP and notify the required authorities.

- Regional General Manager
- Site Manager
- Maintenance Manager
- EHSR Manager

When an immediate threat to human life or property exists, all personnel are authorised to Dial 000 for emergency services and enact individual site emergency response plans.

| Purpose | To provide the public with detail on how AKD will respond to a pollution incident. | | | | |

Plan Objectives.

The objective of this plan is to;

- Detail methods used to assess main hazards.
- Detail controls that may be implemented to reduce risk of hazards impacting on the receiving environment.
- Describe systems for dealing with pollution incidents.
- Outline incident management structures. And,
- Detail the required review and update process.

Description and Loss Likelihood of Main Hazards.

A survey of potential pollutants on each site has been conducted. This process has identified hazards with potential to impact on the environment which are then assessed using a consequence matrix as detailed in **Table 2.** Potential pollutants with risks scores of Insignificant are not considered main hazards.

| | | Risk of Hazard | l to Environment | and/or People | |
|--------------|-----------------|----------------|------------------|----------------|----------------|
| ŝ | Insignificant | Minor | Moderate | Major | Disastrous |
| Consequences | No | Measurable | Noticeable | Significant | Catastrophic |
| en | measurable | environmental | environmental | environmental | environmental |
| n b | environmental | impact. Mildly | impact. Toxic | impact. Very | impact. |
| Se | impact. Very | toxic or low | and medium | toxic and high | Extremely |

| ပ | and not | dangerous. | dangerous. | dangerous. | dangerous. |
| | dangerous. | | | | |

Table 2: Consequence Matrix – Main Hazard Identification.

Risk Reduction Controls.

Infrastructure controls have been installed across all sites to reduce the potential for harm to human health and the environment. Where appropriate, administrative controls may also be used and subject to the potential risk several controls may be implemented for a specific hazard. The effectiveness of risk reduction controls (both infrastructure and administrative) have been assessed using the business risk rating matrix.

Types of controls implemented to date are detailed in **Table 3: Infrastructure controls** and **Table 4: Administrative controls.** As new risks are identified and in the event of a loss, controls will be assessed for effectiveness and suitability.

Procedure for Internal and External Incident Reporting.

All incidents must be reported and investigated. Protocols have been developed to provide guidance on the level of environmental reporting as required under the POEO Act and Regulations. Complying with the PIRMP notification requirements does not remove the need to comply with any other obligations for incident notification, for example, those that apply under other environment protection legislation or legislation administered by SafeWork NSW.

Internal Incident Reporting.

All incidents, hazards and near misses must be reported under well-established reporting procedures utilizing a risk matrix. This provides all internal stakeholders with information regarding severity of a risk or incident and details corrective actions required. These procedures include a review system to ensure all corrective actions are completed.

External Incident Reporting.

The AKD incident notification procedure has been developed to provide specific direction for site-based personnel in the event of a loss of containment. Training to ensure each level of the business understands its obligations with regard to notification is completed annually and also forms part of the review process in the event the plan is activated.

The process involves the use of a wall chart (**Appendix1**) notification assessment worksheet (**Appendix 2**) and notification protocol (**Appendix 3**).

The procedure and associated documentation provide clear guidelines for reporting to external parties and was developed to comply with the POEO Act and regulations.

Mechanisms for providing early warnings and updates to Neighbours.

If an incident has occurred that requires first response emergency services, all communication to external parties will be managed by the person authorised to activate the plan. Each site and incident will require a unique response regarding communication with residents adjacent to the site and subject to the incident, the following mechanisms may be used.

- Notification on website
- Twitter
- Facebook
- Telephone calls
- SMS

- Email to community representatives e.g. consultative committee.
- Letter box drops for updates.
- Door knock.
- Town meetings for updates.

Initial communication with neighbours will be completed in consultation with emergency service advice and directives such as evacuation.

Manner in which plan will be tested and maintained.

This PIRMP requires scheduled testing and maintenance to ensure the process remains current and incident response/notification is completed without delay. As a minimum, the following summary details the review requirements for this plan.

- Review at least once every 12 months and after every incident.
 - Record annual review in Routine Activities of Site EHSR Improvement Plan.
 - Senior management sign off is required for annual review.
- Spill response training and drills every 12 months.
- Provide relevant training on regular basis.
- Amend this PIRMP and record details in Amendment Register.
